CF-Plus Advanced

ICSB's exclusive Canine Fertility Supplement – Advanced Formula (CF-Plus Advanced) appears to improve canine sperm production, ease arthritis effects, and reduce or eliminate immature sperm cells in the canine ejaculate. The appearance of immature sperm cells is thought by many veterinarians to reduce fertility in the canine. ICSB has developed CF-Plus Advanced, which combines the supplements that appear to increase testicular tone and sperm count, as well as eases arthritis pain and discomfort, with an additive that reduces or eliminates the appearance of immature sperm cells. This economical triple purpose supplement has been tested to be a safe additive to improve your dog's reproductive and general well-being.

Directions For Use:

In the male, one tablet for each 15 pounds body weight, daily, for 90 days. Divide the daily dosage between morning and evening. After 90 days, collect semen specimen and compare to that first initially observed.

In the female, one tablet for each 15 pounds body weight, beginning approximately 60-90 days before onset of estrus. Continue for 60 days. This has been shown in many bitches to regulate the estrous cycle and eliminate split heats.

Once the desired sperm quality or estrous regularity is attained, we recommend placing the dog on a maintenance dosage of one tablet for each 30 pounds, daily. If any decrease in sperm quality or estrous regularity occurs, increase dosage to the original recommended amount.

Active Ingredients per Tablet:

Green-Lipped Mussel (*Perna canaliculus*) 300 mg
 L-Leucine 0.01 mg

Inactive Ingredients: alfalfa, brewers yeast, microcrystalline cellulose, silicon dioxide, spirulina leaf powder, stearic acid, (vegetable).

Each bottle contains 450 tablets. Please visit our website, www.ik9sb.com, to place your order today!

CAUTIONS: Safe use in pregnant animals or animals intended for breeding has not been proven. If animal's condition worsens or does not improve, stop product administration and consult your veterinarian. Administer during or after the animal has eaten to reduce incidence of gastrointestinal upset. **Store in a cool, dry place.** Protect from freezing and extreme heat. For use in dogs only. In case of accidental overdose, contact a health professional immediately. Always consult your veterinarian before adding supplements to your dog's diet, especially if you dog has been diagnosed with clotting disorders, is being treated with anticoagulant medications, diabetes, any metabolic disorders causing hyperglycemia, has a history of urinary tract stones, or has known allergies to shellfish. **KEEP OUT OF REACH OF CHILDREN AND ANIMALS.**
